MESSAGE

I extend my profound greetings to the **National Master Plumbers Association of the Philippines, Inc.** as you hold your **89th Founding Anniversary and National Convention**.

Given the essential nature of efficient plumbing systems, your expertise as master plumbers is critical to our goal of developing structures that not only adhere to stringent sanitation standards but also function effectively for their users. Cognizant of the rigorous training and extensive experience that come with the title, I thus welcome this gathering that fulfills the constant need to promote excellence and lifelong learning in your community.

For nearly nine decades of service and dedication, may your activities bring honor to the organization and help deepen the knowledge and wisdom of each attendee. Let your time together likewise strengthen your connection with your mentors and peers as well as promote greater collaboration in your various pursuits and endeavors. With you at the forefront of this important field, I look forward to the growth and expansion of your profession and our economy in this era of *Bagong Pilipinas*.

Congratulations! May you have a productive and insightful event.

FERDINAND R. MARCOS JR.

31 October 2024

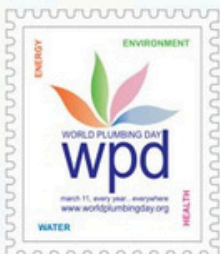

On behalf of the World Plumbing Council, it is my distinct honor to extend our warmest wishes to the National Master Plumbers Association of the Philippines as you gather for this important convention. This week, as you come together to discuss ideas, innovations, and shared challenges, we celebrate the vital work you are doing in plumbing—a profession that forms the backbone of health, safety, and sustainability in every community. From ensuring clean water access to maintaining reliable sanitation systems, the work of master plumbers like yourselves is essential to public health and well-being.

The World Plumbing Council is proud of our recent work with NAMPAP in Manila, as these past twelve months together we have joined forces with PSSE, IAPMO and the World Health Organization to launch a new *Plumbing for Health* program which addresses practical infrastructure improvements for healthcare facilities. As NAMPAP members, you should be aware that our pilot project in June this year was the first ever hands-on, plumbing-focused input to the global WHO-UNICEF *WASH in Healthcare Facilities* program. This was a world first. So, as the World Plumbing Council goes on to develop this vital program together with the WHO and UNICEF in the years ahead, both nationally in the Philippines and internationally, we will remember and recognize the key role that NAMPAP has played in launching this initiative.

Together, we share a vision of improving plumbing standards globally, promoting safe and sustainable practices, and addressing the unique challenges our industry faces in today's world. World Plumbing Council members, like NAMPAP, learn from each other, share best practices, and strengthen the role of plumbing in achieving the United Nations Sustainable Development Goals, especially in areas of water conservation, sanitation, and public health.

As you embark on this week's events, know that you have the full support and admiration of the World Plumbing Council. We are inspired by the innovation and commitment each of you brings to this field, we look forward to continuing our collaboration via *Plumbing For Health* and other opportunities in the future, and we look forward to seeing the incredible progress that will result from this convention.

March 11
every year... everywhere

David Viola, Chair
World Plumbing Council

Republic of the Philippines
Professional Regulation Commission

MESSAGE of the Chairman of PRBOMP

My warmest greetings to NAMPAP and to the esteemed Filipino Master Plumbers!

As the Chairman of the Board for Master Plumbers, I am filled with pride to witness the dedication and passion of NAMPAP national officers and directors, for spearheading this momentous event, the **89th Founding Anniversary and National Convention** on November 22-24, 2024, at Davao City.

Your theme, **"Plumbing Excellence: Innovate, Sustain and Thrive in 2024,"** resonates with the profound impact that we, Master Plumbers are ready to adapt, innovate, and evolve to meet new challenges in the master plumbing profession. Innovation is not a choice but a necessity. With advancements in technology and the growing complexity of the plumbing systems, we are called to develop new approaches, adopt more efficient techniques, and create sustainable solutions that will benefit future generations.

Our profession is one of immense responsibility and impact. This is a unique profession that has put us in charge of leading towards innovation for a greener solution and a more efficient plumbing system. Plumbing is far more than pipes and fixtures; it is a fundamental service that affects the lives and well-being of every individual. We, Master Plumbers, are indispensable on the maintenance of a healthy, safe, and sustainable environment. This is our biggest responsibility that will drive us to uphold the highest standards in the practice of our profession.

Congratulations on your 89 years of exemplary service and leadership. We, in the Board, are one with you in your aspiration towards global recognition of Filipino Master Plumbing professionals. The future of master plumbing lies in our ability to adapt, innovate, and uphold the highest standards in our professional practice. May this remarkable event inspire us to reach new heights, collaboration of knowledge, and forge a path of enduring excellence in the master plumbing profession.

God Bless us all.

HON. REYNALD B. ILAGAN

RMP, PME, ACPE, FACPE, RME, SC, PCO, MPA, FPSME, FIMPAP, FPSMPE, FAPIP
Chairman - Board for Master Plumbers

PROFESSIONAL REGULATION COMMISSION MANILA

PROFESSIONAL REGULATORY BOARD FOR MASTER PLUMBERS

MESSAGE

A big celebration! 89 Years of Excellence and Unity! For 89 remarkable years, you have laid the foundation of a profession that not only ensures public safety but also supports the very infrastructure of your society. Today, as we celebrate the legacy of your organization, NAMPAP, we honor the countless master plumbers who have committed themselves to excellence, innovation, and integrity in their craft. You stand on the shoulders of NAMPAP, honoring 89 years of unwavering dedication, progress, and leadership. Your journey as a professional organization is a testament to the strength of shared vision and collective effort.

Each pipe you laid, each system you designed, is a reflection of your expertise and dedication to the professional organization you served. As you gather at your national convention, remember that you are more than just master plumbers; you are guardians of health, protectors of water, and engineers of tomorrow's solutions.

The challenges ahead demand not only skill but collaboration and forward-thinking. Together, we will rise to meet these challenges, ensuring that our profession remains vital, respected, and ever-evolving.

May the next 89 years be marked by even greater achievements as we continue to build, innovate, and lead with purpose. The future of our profession is in our hands, and together, we will shape it for the better.

Cheers to 89 Years of Building Foundations, Shaping Futures! Congratulations to all the men and women of NAMPAP who have envisioned a professional organization that will serve master plumbers from around the globe.

Mabuhay ang NAMPAP! Mabuhay ang magigiting na Dalubahasang Tubero!

Your Servant Leader,

Jaime Jajay E. Cruz,
MP/PME/ACPE/REB
Member, Board of Master Plumbing
Professional Regulation
Commission

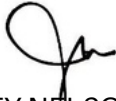

MESSAGE

In behalf of the Trustees, Officers and Members of the Council for the Built and Natural Environments ("CBNE"), congratulations to the National Master Plumbers Association of the Philippines, Inc. ("NAMPAP") for holding its **89th Founding Anniversary and National Convention 2024**. Your theme of **"Plumbing Excellence: Innovate, Sustain, and Thrive in 2024"** aptly reflects the new normal wherein sustainability, protection of the environment and the wise use of our natural resources is paramount. As this convention will showcase new innovations and advances in plumbing design, business development as well as ensuring a safe workplace, the future of our master plumbers is quite bright and they will definitely thrive in 2024 and beyond.

This convention will also allow NAMPAP and its members to rise to the challenge of addressing the effects of climate change by adopting green technology so that we are able to conserve water and be efficient in our energy use. Congratulations to NAMPAP and all those who have contributed to a very successful 89th Founding Anniversary and National Convention. CBNE will always be a partner in all your endeavors.

Mabuhay ang NAMPAP.

JOEY NELSON R. AYSON
President, CBNE/GSP

PHILIPPINE FEDERATION OF PROFESSIONAL ASSOCIATIONS

FROM PFPA PRESIDENT

Greetings!

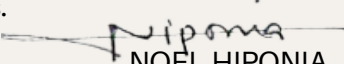

As we celebrate NAMPAP's remarkable 89th anniversary, we are reminded of the vital role each of us plays in building a better nation—one that is built on the principles of integrity, collaboration, and service excellence. It is a great honor to address you on this milestone, where we look back with pride on nearly nine decades of service to our country, while also looking ahead to the opportunities and challenges of the future.

In our profession, and in the greater landscape of licensed Filipino professionals, we carry not only the responsibility of meeting the needs of our clients but also of contributing to the well-being and development of our communities and our nation. The Philippine Federation of Professional Associations (PFPA), which I am privileged to lead, shares this vision with NAMPAP—one of forging unity among professionals, fostering interdisciplinary collaboration, and promoting excellence in everything we do.

Our collective strength lies in our ability to come together, to support one another, and to continuously improve our craft. Through the efforts of associations like NAMPAP, we enhance the professional standards of plumbing and elevate the recognition of the vital work you do. This convention is a testament to your commitment to staying abreast of the latest innovations and ensuring that our country benefits from the best practices in Master Plumbing and beyond.

Let us also remember that professionalism is not only about technical expertise. It's about integrity, perseverance, and the dedication to serve with excellence. At PFPA, we strive to uphold these values by representing and protecting the interests of Filipino professionals, promoting collaboration across disciplines, and encouraging continuous learning. Together, we aim to provide solutions to the nation's most pressing challenges—whether they be social, educational, or technical.

As NAMPAP embarks on another year, I encourage you all to keep strengthening the camaraderie that binds our community of professionals. In doing so, we not only elevate our respective fields but also contribute to nation-building in profound ways. May you continue to inspire, innovate, and lead the way in plumbing excellence, and may our shared commitment to service bring progress and positive change to the Philippines.

NOEL HIPONIA
PFPA President

NATIONAL MASTER PLUMBERS ASSOCIATION OF THE PHILIPPINES, INC. (NAMPAP)

FROM NAMPAP NATIONAL PRESIDENT

Dear NAMPAP Family, As we gather to celebrate the 89th year of NAMPAP, Inc., we stand on the shoulders of giants who have paved the way for our success. This anniversary is not just a reflection of our past; it is a celebration of our resilience, innovation, and the unwavering spirit that binds us together.

Throughout nearly nine decades, NAMPAP has been a beacon of excellence in our industry, championing the values of integrity, collaboration, and progress. Each one of you has played a crucial role in this journey, contributing your unique talents and perspectives. Together, we have overcome challenges, embraced change, and forged new paths.

As we convene for this National Convention, let us take this opportunity to honor our achievements and look forward to the future. Let us inspire one another to dream bigger, work harder, and continue to elevate our profession. The strength of our organization lies in our collective vision and determination.

May this gathering ignite new ideas and foster connections that will propel us into the next chapter of our story. Together, we can build on our legacy, ensuring that NAMPAP remains a leader in our field for generations to come. Here's to our shared journey, our continued growth, and the bright future ahead. Happy 89th Anniversary, NAMPAP!

With warm regards,

RMP Richard M. Mangubat, CE, Ph.D.
National President
NAMPAP, Inc.

History of NAMPAP

The birth of the plumbing profession in the Philippines is traced back to the 17th century. The walled city known as Intramuros was established by the Spaniards as a model community. The Friar Engineers who built the government buildings, residential and other structures, incorporated European standards in their plumbing installations.

During the 18th and 19th centuries, the Filipino plumbers were trained and assigned the task of maintaining, repairing and/or remodeling plumbing systems in all pueblos or towns including churches, convents, and government buildings.

The recognized and knowledgeable plumbers then were called upon by the ilustrados or the elite group in the community to act as consultants of plumber journeymen on matters pertaining to plumbing installations in villas, mansions and houses in the community.

Plumbing took a great leap at the turn of the 20th century with the arrival of the American soldiers, engineers, Thomasite teachers, doctors, and evangelists. Health and hygiene became a priority when epidemics including cholera, leprosy, schistosomiasis and other contagious diseases engulfed the Philippines. Alarmed, Governor General Harrison issued a letter of instruction by using water from potable sources and proper waste disposal through network of pipe in the Plumbing System in all municipalities.

Sometime in 1902, the Plumbing Trade was duly recognized by the government. The City of Manila was the model municipality. Master Plumber John F. Hass became the first Chief of the Division of Plumbing Construction and Inspection. Through the initiative of the Filipino Master Plumbers, a plumbing code based on the Plumbing Code of the United States was incorporated into the Building Code for the City of Manila, defining its role of bringing in water into the building and removing them such as wastewater through plumbing among others.

In 1935, plumbing practitioners lead by persons Francisco Geronimo, Mariano de Ocampo, Igmidio Suarez, Eusebio Mina, Jose Rivera, Raymundo Reyes, Sr., Roberto Feliciano, Gregorio Lazaro, Raymundo Gumapac, John Jones, Trinitarian Ortiz, Valentin Casupanan, Catalino Casupanan, Crispin Francisco, Teodoro Pastor, Cornelio Odvina, and Jesus Tanghal Dera, organized the National Master Plumbers Association of the Philippines (NAMPAP) and had it registered with the Securities and Exchange Commission.

Thereafter, the City of Manila created the Department of Public Services and was enacted into law. City Ordinance 2411 known as "The Plumbing Code for the City of Manila", institutes the guidelines in consultation with NAMPAP for the licensing of Master Plumbers, regulating plumbing practices and requirements for plumbing permits in line with the installation of plumbing system, throughout Manila under the Department of Public Services.

On May 6, 1963, in relation to the question of eligibility of corporation or association to practice plumbing, another opinion through the Secretary of Justice Juan R. Liwag under Opinion No. 82 Series of 1963 clarified as to whether or not these group under artificial names which are not registered as master plumbers with the Board may practice plumbing in the Philippines, under the supervision of registered master plumbers without violating the provisions of RA 1378 which states that "the practice of plumbing involves personal skill and proficiency. Hence, only those who are registered with the Board are presumed to be technically prepared for the job and may be allowed to practice. Otherwise, public health and safety will be endangered".

On September 18, 1957, the office the City Prosecutor of Manila, through Fiscal Edilberto Barot, likewise rendered an opinion that only the Master Plumber should prepare plumbing plans. Opinion was made on the basis that while a Sanitary Engineer is endowed with authority to do the acts contemplated in Sec. 29 of RA 1364 in connection with Sec. 2 thereof, the Master Plumber is empowered to prepare plumbing plans as specifically provided in RA 1378.

On May 6, 1963, in relation to the question of eligibility of corporation or association to practice plumbing, another opinion through the Secretary of Justice Juan R. Liwag under Opinion No. 82 Series of 1963 clarified as to whether or not these group under artificial names which are not registered as master plumbers with the Board may practice plumbing in the Philippines, under the supervision of registered master plumbers without violating the provisions of RA 1378 which states that "the practice of plumbing involves personal skill and proficiency. Hence, only those who are registered with the Board are presumed to be technically prepared for the job and may be allowed to practice. Otherwise, public health and safety will be endangered".

In 1966-1969, the Board of Examiners for Master Plumbers and NAMPAP prepared a Curriculum for Associate Plumbing Engineering and was approved by the Department of Education. It was first introduced and offered at Feati University.

On November 28, 1967, the first amendment to the National Plumbing Code was approved. It effected the inclusion of asbestos-cement pipe as an approved plumbing material. In December of 1996, the use of hubless pipe for C.I. pipes was also approved.

In 1972, Republic Act 6541 otherwise known as the National Building Code of the Philippines was passed in the Senate but was not signed by the President due to the declaration of martial law on September of the same year. Nevertheless, it was adopted and was enacted into a law as PD 1096 of the National Building Code of the Philippines in 1977

Implementing Rules and Regulations (IRR) of PD 1096 was formulated by the DPWH and Plumbing Code was made a referral Code under Rule IX on the subject of sanitation. However, the scope of works for Master Plumbers vested in Sec 2 of RA 1378 were corrupted, specifically in Section 3.2.2.2, thereof, allowing Sanitary Engineers to encroach and diminished the field already embraced by Master Plumbers in violation of their own law, Section 33 of RA 1364.

In 1977, NAMPAP filed Civil Case No. 97-849998 for writ of Preliminary Injunction for Sec. 3.2.2.2 of the Implementing Rules and Regulations (IRR) for PD 1096 at the Regional Trial Court Branch 38, Manila, rendering unfavorable decision of status quo.

Due to the growing population and demand of plumbing in the expanding residential and housing community, the National Government, through the Bureau of Public Works, other city government and municipalities adopted the Plumbing Code of Manila as guide in enforcing sanitation. NAMPAP later on spearheaded the enactment of a law raising its scope into a national level to regulate the practice of master plumbing in the Philippines. This is for the defense of NAMPAP from unscrupulous individuals victimizing house owners with defective works as well as not paying revenue for the practice of plumbing.

In 1954, the Third Congress of the Republic of the Philippines in its second session, approved after the third reading House Bill No. 962 and passed into a law, Republic Act No. 1378 of the "National Plumbing Law of the Philippines". It was signed by President Ramon Magsaysay on June 18, 1955 expanding the scope which applies to all cities and municipalities in the Philippines.

NAMPAP was tasked to formulate the Implementing Rules and Regulation of the National Plumbing Code of the Philippines. It was promulgated and approved on June 18, 1959, which later on became instrumental in the passing of a law creating the National Waterworks and Sewerage System integrating the Metropolitan Water District of Manila.

After the plumbing law was passed and approved, there was nonetheless clarification on a seemingly conflict between the provisions of Ordinance No. 2411 of the City of Manila and those of Republic Act 1378 which holds the examination and issuance of license to Master Plumbers.

In Section 22 of RA 1378, the legislative intention was to enhance a uniform Plumbing Law, harmonizing existing plumbing ordinances of the City of Manila and other chartered cities in the Philippines. It circumscribe the practice of the trade of master plumber to a person who has obtained a certificate of registration in the manner and under the condition set under Ordinance 2411 as provided.

History of NAMPAP

"All Master Plumber, duly registered under the provision of city ordinance in force one year prior to effectivity of their act and all persons with at least five years of continuous practice as plumbers and certified to as capable to practice the trade by the Board of Examiners within one year after the effectivity of this act shall automatically be registered under the provisions hereof. Certificates of Registration held by such persons in good standing shall have the same force and effect as through the same had been issued under the provision of this Act" (O.P. No. 290 Series of 1958 by the Secretary of Justice). Based on the foregoing, the enactment of Republic Act 1378 has the effect of repealing or superceding all conflicting or inconsistent provisions of Ordinance No. 2411 as amended for the City of Manila and similar ordinances of other chartered cities.

On September 18, 1957, the office the City Prosecutor of Manila, through Fiscal Edilberto Barot, likewise rendered an opinion that only the Master Plumber should prepare plumbing plans. Opinion was made on the basis that while a Sanitary Engineer is endowed with authority to do the acts contemplated in Sec. 29 of RA 1364 in connection with Sec. 2 thereof, the Master Plumber is empowered to prepare plumbing plans as specifically provided in RA 1378.

In 1996, NAMPAP Inc. started the update of the National Plumbing Code of the Philippines pursuant to Section 4 of R.A. 1378 in order that the Plumbing Law will be attuned with time and copes up with new technologies. Then on October 1999, the association, with President Jaime M. Cabase, Engr. Ernesto J. Battad, Sr. as Chairman, and Arch. Tony Y. Balde II as Adviser, submitted the draft of the Revised National Plumbing Code to the Chairman of the Board of Master Plumbing. It was endorsed to the Commissioner of the Philippine Regulation Commission for review and approval. Then it was sent to Malacañang and signed into a law by His Excellency, Pres. Joseph Ejercito Estrada on December 21, 1999. The whole text of said Revised National Plumbing Code was published in major daily newspapers and also in the Official Gazette of the Republic of the Philippines, hence, it attains it force and effect as a law. Meanwhile, the Philippine Society of Sanitary Engineers (PSSE) filed an application and petition for the issuance of a Temporary Restraining Order for the implementation of Sec. 101, 102, 102.2 Chapter 14, of the Code but was denied for lack and devoid of merit by the presiding Judge, Hon. Prescilla Baltazar-Salazar of Branch 38 of the city of Manila, upholding validity of the Revised National Plumbing Code of the Philippines.

On January 23, 2002, the Supreme Court in its latest ruling on the case GR No. 141465 - Filipino Pipe and Foundry Corporation versus Total 2000 Corporation declared that the Revised National Plumbing Code of the Philippines, after it was published in the Official Gazette, was effectively in force and effect. The ruling in effect, rendered the petition moot and academic and reaffirmed the rights of Master Plumbers to practice plumbing exclusively and without limitation as mandated by RA 1378 (Plumbing Law), on the same ruling the Supreme Court affirmed the decision of the Court of Appeals dated April 30, 1999, which allows the sales, distribution, and use in the Philippines of hubless pipes subject to the qualification imposed in the Board Resolution of Master Plumbers.

In order to continuously upgrade the technical expertise of Master Plumbers, sustain the growth of the plumbing industry, and access to the new information on plumbing technology, NAMPAP had programmed the holding of regular seminar/session and National Convention, as well as Regional Conferences such as in Luzon, Visayas, and Mindanao. It enables the discussion of the new development in plumbing by giving the manufacturers, dealers and suppliers of plumbing tools, equipment, materials and services the opportunity to conduct product presentation for the benefit of the plumbing practitioners.

The milestone continues and this time focuses its goal in upgrading the profession of Master Plumbers into Plumbing Engineers. NAMPAP crafted the bill and lobby heavily for the approval of the same Plumbing Engineering Law sponsored by Senator Ramon B. Magsaysay in the Senate, and Congressman Francis Joseph Escudero in the House of Representatives.

NAMPAP is also an active coordinator of the Department of Trade and Industry as for construction materials is concerned. It also serves as a consultant to the Revised National Building Code Development office of the Department of Public Works and Highways, and partner of Technical Skills and Development Authority (TESDA) among others, in insuring professional excellence and advancement of the plumbing profession.

CORE VALUES

These principles guide our work and define our mission:

Nurturing - We believe in raising or promoting the development of Master Plumbers for Global Challenge;

Achieving - We are here to perform or carry out with success the objectives of NAMPAP for the advancement of the master plumbers profession;

Mastery - We are committed to the on-going evolution of skill and wisdom in an area of thought or activity through excellent practice, contemplation, application and exploration of knowledge through continuing professional development;

Professionalism - We believe that the expertise and specialized knowledge are critical to the success of our Goals. We maintain the highest professional standards for the benefits of the Society and Ultimately the environment.

Action-Oriented - We believe in the action-oriented organization to pull people together as a team and to motivate them move toward achieving the overall strategic objectives;

Partnership - We believe partnerships with the government, other professions, communities, and other stakeholders are essential to master plumbers success.

OUR MISSION

- I. Produce sufficient revenue to provide the needed resources to achieve our goals by increasing partners and or sponsors.
- II. Encourage membership to actively participate in the programs of NAMPAP.
- III. Asked the help of Political Leaders, Lawmakers and the President of the Philippines for the passage of the new plumbing law.
- IV. Disseminate the truth that the plumbing practice is the domain of Master Plumbers to create public awareness.
- V. Support the Professional Regulations move to implement the Continuing Professional development.
- VI. Implement the NAMPAP By-Laws and its Rules and Regulations.
- VII. Adhere to the Code of Ethics for Master Plumbers at all times.

CODE OF ETHICS

A registered master plumber shall maintain a professional bearing consistent with an honorable and dignified pursuit of his/her profession, adhering to a set of conduct becoming of his/her calling, and shall not:

1. Act in an unprofessional manner and demand any remuneration other than his/her original charges except for additional services not covered in the basic contract;
2. Supplant another Registered Master Plumber after definite steps have already been taken toward his/her being commissioned to perform the contract;
3. Underbid another Registered Master Plumber by reducing his/her professional fees after being informed of the fees charged by the other Registered Master Plumbers;
4. Take the advantage of a salaried government position to compete unfairly with a practicing Registered Master Plumber;
5. Allow the use of his/her License as Registered Master Plumber for a fee to an unlicensed Master Plumber in plumbing works without his/her personal supervision.
6. Injure falsely or maliciously, directly or indirectly, the reputation of another Registered Master Plumber by reviewing his/her work for the same client unless the professional services of the former have been officially terminated and all professionals fees have been fully paid by the client;
7. Advertise in self-laudatory language, act in any manner and engage in any practice which tend to bring dishonor to the dignity of the Registered Master Plumber, the National Master Plumbers Association of the Philippines (NAMPAP) and the plumbing profession.

OUR VISION

The National Master Plumbers Association of the Philippines and the Master Plumbers shall be ACKNOWLEDGED by the Building Officials, the Professional Regulation Commission and the general public, as the only accredited professional organization and the only authorized by law to practice plumbing in accordance with the Plumbing Law and the Revised National Plumbing Code, and as one of the partners of the Government in Nation Building in protecting the ENVIRONMENT, PUBLIC HEALTH & SAFETY.

2) The Plumbing Law shall be updated and the minimum requirements in accepting applicants for licensure examination shall be Baccalaureate Degree Holder and holder of a competency certificate issued by institution recognized by the government.

3) The master plumbers from the Philippines shall be recognized globally. This shall be DONE through the FULL IMPLEMENTATION OF THE REVISED NATIONAL PLUMBING CODE by the concerned agency of the government. The second vision shall be done through passage of a new law for master plumbers- The New Plumbing Law The third vision shall be done through continuing professional development.
